... .. down please help us about intel baytrail chip-set, that is type of chipset? This is old process for windows 8 and 7, but i want to use ubuntu 16.04 LTS and 18.04 LTS to use the network, even to learn network, i need a board that not only can connect the network but also can keep plug and play, it will be better if you also can share some technical details or... Hello, im looking for a 18 inch monitor with HDMI cable, with TN panel. It should be 1080p with 16:9 and a native resolution of 2560x1080. They should support VESA mount. My budget is between 60 and 100 dollars. Thanks in advance. I'm looking for a vga to hdmi adapter that will convert my laptop to an hdtv. My budget is between 40 and 100 dollars. I can't find anything on Amazon or Best Buy that is accurate, so this is my last resort. I have purchased a new Samsung Galaxy Tab A 9.7inch 8GB Smartphone but I don't have access to Windows and I need to make sure it's working and to do that I need to install the Intel XGA adapter. I have to use the adapter that was given to me by the shop (I think they came with my laptop). We need to have installed all the required drivers for an Intel i7 3770 CPU and Radeon 5850 graphics card. The motherboard is an Asus Z97M-D3H. We have the source code which was compiled using the 32 bit Visual Studio 2014 installed on the developer's laptop. However we need to recompile the... We are a small hardware start-up company with a very specific need for a not so expensive new system board (we are talking 82157476af
